

Priorities Mode

1. In **Assignment Mode**, students will work repeatedly at a small group of related problems until they have finished the assigned number. As students finish their assignments (at their own pace), Get More Math automatically transitions into **Priorities** for individually tailored cumulative review. As the year progresses, these Priorities will grow.

"mixed review"

2. Teachers can also put a whole class into Priorities by selecting a class folder and clicking the **Priorities** button.

This shows that your class is now in Priorities mode.
