

Completing a Test Later

1. Teachers may allow students to finish a test at a later time. Students will first need to request the test (select the right drop down icon and "request test").

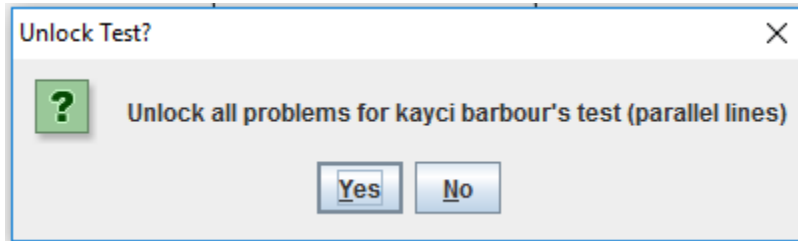

2. Students may continue working on any problem they have not clicked on in the previous sitting. (Note that the student's previously engaged problems are now all locked by default.)

3. The teacher may unlock previous problems for the student when the student clicks on the **request unlock** button.

4. The teacher must confirm the request:

****END****
