

OPTIONS TO HELP WITH STUDENT "STUCKNESS"

PROVIDE GUIDED PRACTICE

Set students up for success by modeling problems during class. Within the app, you can use the Preview button or the Full Screen button to help prepare your students. You can also print worksheets to use for guided notes! ▶

CREATE A SKILLS CLASS/ASSIGNMENT

Create a class that students can switch to when they get stuck that includes some easier skills with simple inputs. This can also be done with an assignment so that students continue earning points within the same class. ▶

BUILD A RESOURCE LIBRARY

Provide students with how-to videos or notes that they can reference when they get stuck. Link the resources by skill code so that students can easily find the problems they are working on, explained by you! ▶

ADJUST CLASS SETTINGS

Within the class settings, you can choose to adjust the skips students can use in Mixed Review, or allow them to work on any problems. You can also adjust the dates in Points History to focus on weekly points for grades. ▶
