

# Winter GMM Challenge Lesson Plan

## get $\text{M}\text{O}\text{R}\text{E}$ math!

### Goal:

Over break, have students continue practicing their math skills in GMM's Spiral Review. This allows students to change the colors of their skills, earn points, and continue to increase their long-term retention of skills.

### Materials:

- Devices (Chromebooks/iPads/computers)
- Goal sheet

### Lesson:

1. Print and distribute the goal sheet to your students **prior to winter break**.

2. Have students navigate to their menus, select Statistics, and record the date along with total number of points earned.

3. Collect the half sheet. If necessary, check the number of points by logging into your teacher application, choosing Student Data, and looking at Points Earned.

The screenshot shows the 'Student Data' menu item highlighted in the left sidebar. The main content area displays a table with the following data:

Name	Points from MR	Proficient Skills	Skill Accuracy	Points Earned
J Smith	72%	52%	90%	733
P Jones	69%	52%	86%	779
K Roberts	75%	57%	88%	826
S Thomas	75%	62%	85%	680
B Lane	62%	67%	88%	1305
L Barnes	68%	71%	83%	1134

4. Before your students start the challenge, some settings need to be changed to ensure student success. A) Switch the class to Spiral Review, B) allow at least 10 problem replacements, and C) turn off all assignments over the break.

The three screenshots illustrate the required settings changes:

- A:** A screenshot of the class period selection menu where the 'Spiral Review' option is selected.
- B:** A screenshot of the 'Settings' menu where the 'Problem Replacements Per Day' is set to 10.
- C:** A screenshot of the 'Assignments' settings page where the 'Allow students to switch to Mixed Review prior to completing the default Assignment' toggle is turned off.

5. **After the winter break**, return the half sheet to students and have them repeat the process in #2.

6. Collect to compare the points earned prior to and after the break. Provide a reward for the student who has earned the most points. (GMM bucks, candy, homework passes, listen to music, game time tickets, etc.)

Good luck, have fun, and get $\text{M}\text{O}\text{R}\text{E}$ math!
