

Goal: Prepare students to self-evaluate their progress in GMM.

Materials:

- Devices (Chromebooks/iPads/Computers)
- Student Data Worksheet (attached or use [fillable version](#))

Lesson: Before Class

1. Print Student Data Worksheet or share [electronic fillable version](#) with students.
2. Access Student Data (Spiral Review) from teacher account.
3. From CLASSES, turn off assignments so student can only work in Spiral Review.
4. From Settings, turn off (gray) the slider for 'Students can only work on Skills worth a point.'

During Class

1. Share with students that self-monitoring is a useful skill.
2. If possible, project a fake student to show students how to complete boxes on the worksheet.
3. Provide worksheet access.
4. Have students log in to GMM.
5. Instruct students to fill in all rectangular boxes using their screens.
6. Have students view their squares in Spiral Review. Conference with individual students, completing the ovals and reviewing the action plan with each student.

Some suggestions for improvement.

- I want to decrease my rotation time.
- I want to increase my number of green squares.
- I want to clear any exclamation marks.
- I will earn more points.
- I will have 70% of squares at green or better by the next meeting.

After Class

1. From CLASSES, go to Settings and turn on (green) the slider 'Students can only work on Skills worth a point.'

Name _____ Class _____

- Fill in the empty rectangles with data from your student account.
- Meet with your teacher to complete the data for the empty ovals.
- Fill in the boxes to reflect on your data.
